**Subject:** Vertical Cloud Quarry (Dove Creek)

Lynn:

Bill reflagged the Vertical Cloud Quarry to address our concern over the proximity to the nearby seeps. The archeologist and I were out there 21May, and I GPSed new boundary. Didn't find anything of concern, two worked obsidian pieces just outside new boundary, would have been in the old boundary.

Acreage has changed from 2.16 acres to 1.42 acres. After completing area I noted that I had missed one flagging that seemed out of place. I made a point feature for it, it wouldn't change acreage hardly.

I'm scheduled to go out with our botanist next couple weeks to do plant survey, I think that is it with the surveys, I hope. I think I've covered most of that area on foot several times in last year. Steve
